

2025 Sustainable Energy Program

General Guidelines

- Qualifying equipment must be new and installed within LES' service territory.
- Incentives are limited and offered on a first-come, first-serve basis. Once LES pre-authorizes a project, funds are reserved in a customer's name for a limited time. **Pre-authorization before installation is required where specified in program documents.**
- Equipment must be installed and operational before reimbursement is issued.
- LES reserves the right to complete an on-site verification prior to and after installation.
- A \$100,000 annual incentive cap will be applied to each program measure (i.e., insulation, space conditioning, water heating, miscellaneous commercial and industrial measures) per customer. This cap may be lifted at LES' discretion if sufficient incentives remain at or after mid-year.
- Any piece of equipment cannot qualify under more than one SEP incentive program measure unless otherwise authorized.
- **Incentives cannot exceed 50% of costs directly associated with equipment, material, and third-party labor costs for the purchase and installation of qualifying measures.** Costs are determined after deducting all contractor, distributor and/or manufacturer warranty adjustments, discounts, reimbursements, rebates, incentives, and gift certificates.
- If a wholesaler applies for an incentive on behalf of their customer, the funds will be issued directly to the customer unless otherwise authorized.
- Falsifying information will result in a claim by LES for the return of reimbursement and expulsion from the program.
- LES is not responsible for any tax imposed resulting from reimbursement.
- LES does not endorse or warrant any contractors, manufacturers, products, or system designs in promoting this program.
- The customer/contractor agrees that each measure complies with all federal, state and local safety, building, and environmental codes. All products must be UL-listed and installed per manufacturers' instructions where applicable.
- The customer/contractor is responsible for properly disposing and/or recycling any waste generated by participating in this program.
- LES reserves the right to publicize customer participation in this program unless otherwise notified in writing.
- LES does not guarantee products or energy savings.
- LES shall own all rights to existing and future emissions credits, efficiency certificates, renewable energy credits, tradable renewable certificates and/or any other environmental benefits associated with the implementation of all projects that receive LES incentives.
- LES is making this program available for the benefit of its customers, and the program is in no way intended to create a property right or interest in any participating contractor, seller, or other third party.
- Sustainable Energy Programs are subject to change without notice. All authorizations under the program are based upon compliance with Program Guidelines within the sole discretion of LES.
